

EMP 1-Paper 3: Impact of recent and future climate change on vector-borne diseases

Term / Phrase	Synonyms
vector-borne disease	disease transmitted by vectors, vector-transmitted illness, insect-borne disease
multifaceted	complex, many-sided, multi-dimensional
civilizations	societies, cultures, communities
facilitating	promoting, aiding, helping
conquest	invasion, subjugation, takeover
territory	region, area, land
vector	carrier, transmitter, organism that spreads pathogens
pathogen distribution	spread of pathogens, pathogen dissemination, disease agent spread
temperate / 'tɛmp(ə)rət/	mild, moderate climate, non-extreme
peri-Arctic	near-Arctic, sub-Arctic, close to Arctic
Arctic	polar region, north polar area
tropical highland regions	equatorial mountainous areas, elevated tropical zones
mitigate	alleviate, reduce, lessen
severity	seriousness, intensity, gravity
mobility	movement, circulation, migration
goods	commodities, merchandise, products
insecticide resistance	pesticide tolerance, immunity to insecticides
on the rise	increasing, growing, escalating
maintained	sustained, preserved, continued
battle	struggle, fight, conflict
emerging disease	newly appearing disease, novel infection, recent outbreak
unprecedented	unmatched, extraordinary, never before seen
millennium	thousand years, era, epoch
anthropogenic emissions	human-caused emissions, man-made emissions, pollutant release
flash floods	sudden floods, rapid flooding

countdown initiatives	time-bound programs, target-driven projects
implementation	execution, application, enforcement
plague outbreaks	epidemics of plague, plague epidemics
wiped out	eradicated, destroyed, eliminated
importation	introduction, bringing in, influx
measles	rubella /ru: 'bel.əl/
smallpox	Variola /və 'rʌlələ/, pox disease
susceptible	vulnerable, prone, sensitive

indigenous populations	native peoples, aboriginal groups
devastated vulnerable populations	severely affected weak groups, destroyed at-risk communities
autochthonous	local, native, originating in place
sanitation	hygiene, cleanliness, public health measures
political instability	governmental unrest, political turmoil
deforestation	forest clearance, logging, tree removal
afforestation	tree planting, reforestation
impregnated bed nets	treated mosquito nets, insecticide-treated nets
soil-borne	earth-transmitted, soil-originating
food-borne	ingested via food, diet-transmitted منتقلة از طریق غذا
hamper	obstruct, hinder, impede
arthropod vectors	insect carriers, arthropod transmitters
ectothermic	cold-blooded, temperature-dependent
vector biting	insect feeding, mosquito biting
threshold	limit, cut-off point, boundary
incubation period	latent period, developmental phase
entomological	insect-related, study of insects
reshuffle	rearrange, reorganize, redistribute
prominent illustrations	clear examples, notable instances

starving	famished, malnourished, hungry
habitat	natural environment, ecosystem, dwelling place
anthropogenic pressure	human impact, man-made stress
biodiversity	variety of species, ecological diversity
spatiotemporal changes	space-time changes, geographical and temporal shifts
hindered	blocked, obstructed, impeded
El Nino Southern Oscillation	ENSO, climate cycle, El Nino phenomenon نوسان جنوبی ال نینو
latter	second, last mentioned
led to	resulted in, caused, brought about
controversy	dispute, debate, argument
attribution	assignment, identification of cause
latitudinal	related to latitude, north-south orientation وابسته به عرض جغرافیایی
altitudinal	elevation-related, height-based
avian malaria	bird malaria
trypanosomiasis	sleeping sickness, Chagas disease (American type)
Rift Valley Fever	RVF, mosquito-borne viral fever
bluetongue	viral livestock disease, ruminant fever
state-of-the-art	cutting-edge, advanced, modern
deployment	use, application, implementation

plasmodium parasites	malaria parasites, Plasmodium species
used to be prevalent	once common, formerly widespread
drainage of marshes	drying wetlands, land reclamation
precipitation	rainfall, snowfall
stringent	strict, rigorous, severe
endemicity	local occurrence, restricted presence
eradicate	eliminate, destroy, wipe out
indigenous	native, aboriginal, local

morbidity	illness rate, disease prevalence
mortality	death rate, fatality
due	planned, scheduled
rolled out	introduced, launched, implemented
fringe	border, edge, periphery
unbearable	intolerable, unendurable, oppressive
tropical plains	equatorial flatlands, lowland tropics
offset	balance, compensate for, counterbalance جبران کردن
counteract	neutralize, oppose, resist
puzzling	confusing, perplexing, mysterious
nosocomial /ˌnɒsə(ʊ)ˈkəʊmiəl/	hospital-acquired, healthcare-associated
austerity measures	economic cutbacks, budget restrictions
endemicity	the quality of being endemic
tackle	address, deal with, confront
resurgence	revival, reemergence, renewal
arbovirus /ˈɑːbə(ʊ)vʌɪrəs/	arthropod-borne virus, insect-transmitted virus
